DETAILED ACTION

1. This office action is in response to Applicant's communication filed on 19 December 2003.

2. Claims 1 and 2 are pending in the application

Acknowledgements

 Applicant's claim for the benefit of a prior-filed application under 35 U.S.C. 119(e) or under 35 U.S.C. 120, 121, or 365(c) is acknowledged.

Double Patenting

- 4. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See Miller v. Eagle Mfg. Co., 151 U.S. 186 (1894); In re Ockert, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and In re Vogel, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).
- 5. A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.
- 6. Claims 1 and 2 of this application conflict with claims 1 and 2, respectively of Application No. 10/763571. 37 CFR 1.78(b) provides that when two or more applications filed by the same applicant contain conflicting claims, elimination of such claims from all but one application may be required in the absence of good and sufficient reason for their retention during pendency in more than one application. Applicant is required to either cancel the conflicting claims from all but one application or maintain a clear line of demarcation between the applications. See MPEP § 822.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b). by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and

8. Claims 1 and 2 are rejected under 35 U.S.C. 102(e) as being anticipated by Macrae (US

Claims 1 and 2:

2003/0093310).

Macrae, as shown, describes and/or discloses the following limitations.

was published under Article 21(2) of such treaty in the English language.

- · A strategic business method for financial institutions, comprising:
 - establishing a strategic metric (Macrae, in at least [0025] states: "These deliverables include [...] Strategic Goals & Metrics [...]" (emphasis added) where the 'deliverables' corresponds to establishing and the emphasized text correspondence is self-evident.);
 - setting measurable goals using the established strategic metric (Macrae in at least [0028] states: "Missions [] assign specific responsibilities to company organizations for attaining measurable goals and for implementing the Corporate strategy as defined in the Business and Technology Strategic Plan []." (emphasis added) where setting measurable goals corresponds to the 'measurable goals...implementing the ... strategy as defined in...' and the 'plan' and the term 'defined in' corresponds to using the established strategic metric.):
 - communicating the goals effectively (Macrae in at least [0080] states: "This phase may also involve [...] communicating changes to the organization; and rewarding successes and lessons learned." (emphasis added) where

Art Unit: 4143

'communicating changes' corresponds to communicating the goals and 'rewarding successes' is an example of do so effectively.); and

measuring and reporting progress in reaching the goals (Macrae in at least [0072] states: "[M]etrics are collected on data required [...] to measure goal achievement and progress [...]" (emphasis added) where the emphasized text corresponds to measuring ...progress in reaching the goals. Macrae in [0063] specifically refers to "status reporting" pertaining to the metrics.)

With respect to Claim 2, Examiner notes that the distinguishing term structure is inherent in the invention. Moreover, Macrae, in at least [0019] specifically describes and/or discloses the following: "The Business Management Process (BMP) provides a structured, process-centric approach to defining: the <u>business direction</u> of a company; specific, <u>measurable goals</u> for the company; a high-level <u>plan</u> to achieve those goals; and the <u>necessary infrastructure</u> required to support the high-level plan." (emphasis added) where the 'structured, process-centric' corresponds to the structure for establishing...and the remaining elements of the limitations.
